PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, MIT World Peace University, graduating July 2027) and Software Engineer Intern building data pipelines, data models and full-stack applications. Experienced in Python, SQL, PostgreSQL, ETL, Apache Iceberg, Trino and Docker, plus React, Node.js and LLM integration (Gemini API). Delivered 3 production data pipelines, 5 normalized data models and 20+ data-quality checks. Co-author of a Springer-accepted AI research paper. Available for a 6-month internship (Jan to Jun 2027) and full-time roles from July 2027.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java, C++
Data Engineering: ETL/ELT Pipelines, Data Modeling, Data Warehousing, Data Lakehouse, Apache Iceberg, Apache Parquet, Trino, Hive Metastore, MinIO, pyarrow
Data Analysis & BI: pandas, Data Cleaning, Data Validation, Data Quality, KPI Reporting, Power BI, Data Visualization, Excel
Databases: PostgreSQL, MySQL, MongoDB, Relational Database Design, Normalization, Query Optimization
Web & Backend: React, Next.js, Node.js, Express, Django, REST APIs, JWT Authentication, HTML, CSS
AI / ML: LLM Integration, Gemini API, Prompt Engineering, Structured Output Validation, AI Agents, MCP
Cloud & DevOps: Docker, Docker Compose, Git, GitHub, GitHub Actions (CI/CD), Linux, Vercel, Render
Core CS: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Cloud Computing, Agile, SDLC

WORK EXPERIENCE

Software Engineer Intern **Jul 2026 - Present**
Augmented Transformations Pvt. Ltd., Pune, India

- Built 3 ETL data pipelines in Python and SQL that load PostgreSQL data into Apache Parquet and Apache Iceberg tables for analytics.
- Designed 5 normalized data models with foreign-key validation, producing reliable, analytics-ready datasets.
- Wrote 20+ automated data-quality checks that catch schema inconsistencies, invalid relationships and incomplete records.
- Queried PostgreSQL and lakehouse tables with Trino to validate data and support analytical reporting.
- Containerized PostgreSQL, MinIO, Hive Metastore and Trino with Docker Compose for reproducible development and testing.

PROJECTS

Research Copilot - AI Manuscript Compliance Checker **May 2026**
Tech: React, Node.js, Express, Gemini API, Vercel, Render | github.com/YashLadlapure/research-copilot

- Built a full-stack AI tool that checks research papers against Springer LNCS and IEEE formatting rules and produces a severity-tagged compliance report.
- Implemented section parsing and rule-based validation across multiple document profiles before any LLM call.
- Integrated the Gemini API with JSON-schema validation, retry logic and side-by-side diffs the author approves, improving output reliability.

Supply Chain Command Center - Data Analytics **Aug 2026**
Tech: Python, PostgreSQL, SQL, Power BI | github.com/YashLadlapure/supply-chain-command-center

- Generated a reproducible year of supply-chain operations data in Python and modeled it in a 9-table PostgreSQL schema.
- Wrote 24 SQL KPI queries and 12 data-quality checks covering OTIF, fill rate, supplier scorecards and stock-out risk.
- Built a Power BI dashboard that turns the KPIs into an operations report for business stakeholders.

Trino-Postgres-MinIO Federation - Data Engineering **Jul 2026**
Tech: Python, SQL, Trino, PostgreSQL, MinIO, Iceberg, Docker | github.com/YashLadlapure/trino-postgres-minio-federation

- Built a local data lakehouse federating PostgreSQL, MinIO object storage and Hive Metastore behind Trino.
- Seeded 100+ relational records, exported them to Parquet and registered Iceberg tables for cross-source SQL queries across 3 systems.
- Deployed the full stack with Docker Compose and ran regression tests and data-quality checks across all services.

EDUCATION

B.Tech, Computer Science and Engineering **Aug 2023 - Jul 2027**
MIT World Peace University, Pune
Coursework: Data Structures & Algorithms, Database Management Systems, Artificial Intelligence, Operating Systems, Cloud Computing, Software Engineering

ACHIEVEMENTS

- Research: Co-author, "AyurGPT", an AI dietician agent combining Ayurvedic principles with nutritional science; accepted at BrainCon, Springer (Volume 2), publication in progress.
- Smart India Hackathon (SIH): College Finalist and Team Lead; led AyurGPT from ideation to finalist presentation.
- Competitive Programming: Regular DSA practice on LeetCode, CodeChef and AlgoZenith; solutions published on GitHub.

CERTIFICATIONS

- Introduction to Cloud Computing - IBM (Coursera) (Jun 2025)
- AI Engineer Agentic Track: The Complete Agent & MCP Course - Udemy (Jun 2026)
