YASH LADLAPURE

SOFTWARE ENGINEER INTERN | FULL-STACK, BACKEND & AI

Pune, India • +91 81800 33454 • yash.ladlapure@gmail.com
GitHub | Portfolio |

SUMMARY

B.Tech CSE student at MIT-WPU and Software Engineer Intern building Python/SQL data pipelines, containerized development environments, and deployed full-stack applications. Built an AI-assisted manuscript tool using Gemini with structured validation and human-reviewed diffs; comfortable working across React, Node.js, APIs, databases, and Docker.

EXPERIENCE

Software Engineer Intern | *Jul 2026 – Present*
Augmented Transformations Pvt. Ltd. — Pune, India

- Built 3 Python/SQL pipelines transforming PostgreSQL data into Parquet and Apache Iceberg tables, queried through Trino.
- Designed 5 normalized data models with foreign-key validation and ran 20+ data-quality checks for schema and relationship issues.
- Containerized PostgreSQL, MinIO, Hive Metastore, and Trino with Docker Compose to make the local lakehouse environment reproducible.
- Worked across data-engineering workflows involving GenAI, computer vision, and IoT analytics; documented validation and troubleshooting steps.

SELECTED PROJECTS

Research Copilot | React, Vite, Node.js, Express, Gemini API | Live demo

- Built an AI-assisted manuscript checker for Springer LNCS and IEEE Conference profiles, producing severity-tagged compliance reports.
- Combined deterministic rule-based checks with Gemini-assisted section refinement; added retry handling and side-by-side diffs so users review changes before accepting them.
- Deployed the frontend on Vercel and backend on Render; published setup instructions and a clear frontend/backend project structure.

InternSetu | Next.js, TypeScript, Node.js, PostgreSQL, Docker

- Developed an internship discovery and application-tracking platform with listings aggregated from multiple sources, student profiles, and application status tracking.
- Built a PostgreSQL-backed REST API and secure session-based authentication; organized the app into frontend, backend, and database modules.

Meme Vault | React, Node.js, Express, MongoDB, Cloudinary

- Built a full-stack meme-sharing application with upload, browse, like, and share flows; implemented JWT authentication and REST APIs.
- Integrated Cloudinary for image storage and delivery, with a responsive React interface and infinite-scroll feed.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, C++
Application: React, Next.js, Node.js, Express, Django, REST APIs, JWT authentication
Data & infrastructure: PostgreSQL, MongoDB, MySQL, Docker, Docker Compose, GitHub Actions, Linux
AI & data systems: Gemini API, structured output validation, Apache Parquet, Apache Iceberg, Trino, MinIO, pandas

EDUCATION & RESEARCH

B.Tech, Computer Science & Engineering — MIT World Peace University (MIT-WPU), Pune | 2023–2027

Co-author, “AyurGPT: An AI-Driven Heuristic Dietician Agent Integrating Ayurvedic Principles with Modern Nutritional Science” — accepted at BrainCon, Springer Volume 2 (2026); publication in progress.
